

Flavored Sugar-Free Oral Suspending Vehicle

ORA-Blend® SF is a flavored sugar-free oral suspending vehicle used to simplify the process involved in the extemporaneous compounding of oral suspensions. Medicated powder can be incorporated into ORA-Blend® SF to form elegant, uniform and physically stable suspensions.

Applications

ORA-Blend® SF combines the suspending properties of ORA-Plus® with the flavoring agents of ORA-Sweet® SF and is ideal for:

- Pediatric suspensions
- Geriatric suspensions

Properties

ORA-Blend® SF is an aqueous-based sweetened vehicle consisting of a synergistic blend of suspending agents that have a high degree of colloidal activity. The suspending agents form a structured, gel-like matrix which suspends particles and allow for little settling. ORA-Blend® SF is buffered to a slightly acidic pH to help reduce degradation of medicinal agents through oxidation. An anti-foam agent is incorporated in ORA-Blend® SF to allow for vigorous shaking with minimal foam.

Contains:

Purified water, sorbitol, glycerin, berry citrus flavor, microcrystalline cellulose, carboxymethylcellulose sodium, xanthan gum, carrageenan, calcium sulfate, trisodium phosphate and sodium saccharin, sodium phosphate, citric acid and sodium citrate as buffers, dimethicone antifoam emulsion. Preserved with methylparaben, propylparaben and potassium sorbate.

Specifications

Appearance: Opaque, pinkish liquid

pH: Approximately 4.2

Taste: Sweet citrus-berry flavor

Viscosity: Approximately 1000 cps at 25°C via Brookfield viscometer

Osmolality: 1027 mOsm/kg

Net Contents
473 mL

 Padagis

Available through your wholesaler or distributor.

Compounding Examples

LAMOTRIGINE 1 mg/mL, 100 mL¹

Lamotrigine 100 mg/tablet	1 tablet
ORA-Blend® SF	q.s. 100 mL

- Expiration 91 days at 4°C and 25°C
- Protect from light
- Shake well before using

SPIRONOLACTONE 5 mg/mL, plus HYDROCHLOROTHIAZIDE 5 mg/mL, 120 mL³

Spironolactone-Hydrochlorothiazide 25 mg/25 mg/tablet	24 tablets
ORA-Blend® SF	q.s. 100 mL

- Expiration 60 days at 5°C and 25°C
- Protect from light
- Shake well before using

RIFAMPIN 25 mg/mL, 120 mL²

Rifampin 300 mg/capsules	10 capsules
ORA-Blend® SF	q.s. 120 mL

- Expiration 28 days at 5°C and 25°C
- Protect from light
- Shake well before using

VERAPAMIL HYDROCHLORIDE 50 mg/mL, 120 mL³

Verapamil HCl 80 mg/tablet	75 tablets
ORA-Blend® SF	q.s. 120 mL

- Expiration 60 days at 5°C and 25°C
- Protect from light
- Shake well before using

General Directions for Compounding ORA-Blend® SF Suspensions

- Calculate the total amount of active ingredient and volume of solution needed to create a suspension of the proper concentration. (Calculations are provided in the examples to the left.) *It may be wise to add approximately 10% overage for compounding losses.*
- Crush tablets with a mortar and pestle to a fine powder. If the compound is already in the powder form, use the mortar and pestle to smooth out the powder.
- Add a small amount of **ORA-Blend® SF** and triturate to a thick, smooth paste. Add the remainder of the **ORA-Blend® SF** by geometric dilution.
- Mix briefly with a mortar and pestle until a uniform suspension is formed.
- Dispense in a tight, light resistant amber bottle with appropriate labeling.
- Label with an expiration date. *If the stability of the medication in an oral suspension or syrup is unknown, conservative dating is suggested.*
- Depending on the medicinal agent used, label containers “Shake Well Before Using”, “Protect From Light”, and “Keep Refrigerated”.

Contraindications

ORA-Blend® SF is contraindicated in persons who have shown hypersensitivity to any of the listed ingredients.
